DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1, 55-57 and 62 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The chemical structure in Claim 55 is vague. The chemical structure should be part of Claim 56 not Claim 55.

In Claims 1 and 56, the definition for R¹ is vague because R¹ contains at least one Si atom, which is not an optional requirement.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 2-6, 25-30, 49-54 and 63-68 are rejected under 35 U.S.C. 103(a) as being unpatentable Chao et al. (Physical Rev. Let. Vol. 86, No. 18, pages 4048-4051, 2001).

The reference discloses a liquid crystal material of the following structure, which comprises a smectic A and smectic C phases. The profiles of the associated heat-capacity anomalies are found to be strongly thickness dependent and exhibit a novel crossover behavior in reduced dimensions. The anticlinic coupling between tilted surface layers in the smectic-A phase were measured.

4. Claims 60 and 61 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action in independent form including all of the limitations of the base claim and any intervening claims.
